Safety Direct International Ltd
Mr T.W. Tyrell-Roberts
The Hedges
Marley Road
Exmouth
Devon
EX8 5DW

4th May 2001

Dear Sirs,

Further to our previous years correspondence relating to anti-slip treatment and the impact on the cleaning regime implemented by your selves.

The treatment for the second year has proven to be effective and the implementing of mechanical equipment for the cleaning regime has enabled the staff more time for participation with client duties.

The monitoring program of the slip resistance provides the ultimate confidence that for whatever reason, falling standards will be recognised and rectified at an early stage.

The company has more than 60 clubs with an annual turnover in excess of £86 million, the success of this club will endorse the anti-slip treatment and cleaning regime in all clubs in the not too distant future.

Charles Butler

Managing Director
