# DIY

## Anti Slip Floor Treatment

*used on over  
9 million  
square feet  
of tile  
around  
the globe.*

Product Code: REDX1

- ▶ **RED-X™** is a **biodegradable** anti-slip floor treatment that features unique technology that can be **applied by you and your staff** to make hard tile and concrete floors less slippery when they are wet and contaminated. **RED-X™** has been **commercially used on over 9 million square feet of tile** around the globe.
- ▶ **RED-X™** is formulated without harmful acids. The tread pattern it creates cannot be discerned with the human eye but when wet the **increased traction** creates a much **safer floor** to walk on.

### Features Include:

1. Easy to use and simple to apply by your staff without special equipment
2. Just use straight from the bottle
3. Clean the floor as usual, before application of **Red-X™**
4. No change to the surface appearance
5. No color change; No burnt surface; No white residue
6. Can be used indoors or outdoors
7. Rejuvenates old and worn tiles
